now 12c.**Ducholke—Miller.**

At St Matthew's church, Stony
Plain, on Sunday, June 28, Miss
Clara Miller, daughter of Mr and
Mrs Philip P. Miller, Stony Plain,
became the bride of Mr Edward
Ducholke, son of Mr and Mrs
George Ducholke, Golden Spika.
The pastor, Rev EEBerhart, of-
ficiated.

The happy young couple are
spending a honeymoon at Calgary
and Banff.

Schultz—Harper.

A ceremony of interest to resi-
dents of this district was the mar-
riage in Vancouver on Tuesday
June 30, of Mr Edward Schultz,
son of Mr and Mrs Cassa Schultz,
to Miss Virginia Harper, of Port-
land, Oregon. 'Eddie' attended
school in Stony Plain for several
years.

Mumford—Becker.

In Edmonton, on Monday,
June 29, Miss Dorothy Kath-
erine Becker, daughter of Mr
and Mrs Joe Becker, Stony
Plain, became the bride of
Mr Ralph Mumford, of Ed-
monton. The ceremony was
solemnized in the social room
at the First Presbyterian
Church, 105th Street, by the
pastor, Rev McKee. Miss
Vera Becker, sister to the
bride, was the bridesmaid.
Mr Lawrence Mose was the
groomsman.

The young couple are spend-
ing their honeymoon at Pig-
eon Lake.

The Armbruster Mill Burns.

About 24.20 Tuesday morn-
ing fire was discovered in the
Armbruster mill, in the north-
west corner, where the grain
crusher was located. On the
alarm being given, the volun-
teer firemen quickly respond-
ed, bringing the fire engine
and other equipment.

Owing to the strong west
wind blowing at the time
and the hold the flames had
on the main building, the fire-
men devoted their efforts to
save the adjoining building.

After a lengthy fight, this
was achieved, and the fire
was got under control about
4.30 a.m.

Fortunately, the larger
building, to the east of the
mill, containing the finished
lumber, edgings, mouldings,
etc., was saved, as also was
the mill's office.

The electric power wires
attached to the building were
a source of danger to the fire
fighters until an employee
of the Calgary Power Co came
out and disconnected these.

The loss to Mr Armbruster
is estimated at approximately
\$25,000, covered by a com-
paratively light insurance pol-
icy.

The last fire at the Arm-
bruster mill occurred about
22 years ago, when the mill
was located near the site of
the Daunhauer residence, on
Meridian road.

Drive Them Off The Highways

Some time ago it was predicted that with the advent of the warm summer weather which tempts people to enjoy outdoor life as much as possible the newspapers would carry stories of automobile accidents, recording the deaths of some and injury of a great many more.

The prediction is a safe one and is already being amply fulfilled. Even before the hottest summer months had arrived a number of smashes with their accompanying fatalities and injuries were reported in screaming headlines in the daily press.

Eye witnesses of one accident in one of the prairie provinces report that a couple of men were driving a brand new car along a crowded highway towards one of the cities on a Sunday evening. With the speedometer recording 75 and 80 miles an hour they flashed past scores of cars laden with men, women and children returning from a day at the summer resorts. As the speeding car tore past other automobiles, some of them travelling at almost equally unreasonable speeds under such traffic conditions, the occupants turned round and waved a derisive "ha, ha", gloating in their ability to "beat the other fellow." The inevitable happened. The driver lost control, or there was a blow out and the two occupants completed their journey to the city in an ambulance, broken limbs and pain-twisted features bearing mute testimony to their agonies. The erstwhile handsome car lay partly on the highway and partly in the ditch beyond the semblance of a vehicle.

Fortunately in this particular instance the two occupants of the car were the only persons to suffer as a result of their recklessness; but for an hour or more they had jeopardized the lives and limbs of scores, perhaps hundreds of people using the highways in a legitimate and sane manner, including many women and children.

Such recklessness on the highway is nothing less than criminal and those who come to grief as a result of such misuse of the roads and motor vehicles have only themselves to blame. A worse feature, however, is the menace of such wild driving to other people. Even at moderate speeds of 35 and 40 miles an hour the highways are none too safe, but with speed-crazed individuals at the wheel the roads become potential and sometimes actual slambags.

While the police are on the watch for reckless fools and do all they can to protect legitimate users of the highways there are not enough of them on the job to ensure complete protection and it is doubtful if the provinces can afford to employ sufficient patrolmen to furnish immunity from all dangerous pests.

Under such circumstances the only safeguard for reasonable people is to arouse public opinion against criminals of this type to the extent that sane drivers will be willing to report them to the police and appear in court to testify against them. Such complaints, supported by adequate testimony, should inevitably result in cancellations of drivers' licenses, or at least suspension for a considerable period of time.

After all, the sensible driver, who reports the action of crazy drivers who endanger the lives of others is merely carrying out the law of self-preservation and is doing a public service in the interests of his fellow men and women. No one would hesitate to report a wild man running amuck with a knife or an axe, yet a wild man at the wheel of a powerful automobile is a much greater potential danger to the public.

No person should feel a bit squeamish about reporting dangerous violations of the laws of safety or harbor the notion that because he and his family have been safely passed it is none of his business. If two or three drivers report the recklessness of another their testimony should be ample to ensure conviction. If half a dozen or more report a case, the evidence would undoubtedly be regarded as overwhelming.

Not very long ago newspapers reported the organization of a new safety body, the Dominion Automobile Safety Council Inc., with headquarters at Montreal, coupled with the announcement that its chief function is to promote safety measures by educational means designed to cut down the motor car accident toll throughout Canada.

Such an organization can perform a very useful function to society in arousing public opinion and assisting in dispelling the comparative apathy with which the general public appears to regard a very important question. The proposal that the co-operation of the driving public to report all cases of wild driving on the highways be sought, might well be recommended.

Such drivers should be driven off the highways.

The discovery of the earliest known written psalm was recently announced. A cuneiform inscription of about 15 B.C. which has puzzled Syria was in reality the earliest known written psalm.

For writing one of the world's best sellers, "Black Beauty", the Englishwoman, Anna Sewall, received only \$100. On a straight royalty basis it would have returned her upward of \$300,000.

Motor Roads In Britain

Increase In Traffic Is Causing Worry To Authorities

It is said that the British Isles have never been known better than they are today by more of those who inhabit them; and small wonder in view of the means of locomotion available, observes the London correspondent of the New York Sun.

Road traffic has more than doubled in five years. In Great Britain there are 178,000 miles of public highways, of which 43,000 are classified roads. The total number of vehicles using them last year was 2,581,000, as compared with only 873,700 in 1921. One person in every 19 now possesses an automobile. But there are 10,000,000 or more cyclists also using the roads.

According to Hore-Belisha, minister of transport, Britain, in the 20th century, has become the "most densely vehicled" country in the world, having 23 registered motor vehicles to the square mile as compared with seven in the United States. The increase has been so rapid, he contends, that engineers and surveyors have not been able to evolve the means of assuring the free flow of traffic in conditions of methinks and safety.

In the next five years \$450,000,000 is to be expended on roads, and in that period it is also planned to construct 230 miles of cycle tracks and 750 miles of dual carriageways. Although increased safety for the cyclists will be assured by construction of cycle tracks such as are already widely in use on the continent, many of the cyclists resent the efforts to circumscribe their use of ordinary traffic arteries.

Japanese Zeppelin Service

Japan May Purchase Two Or More German Dirigibles

Japanese sponsors of ambitious plans for a trans-Pacific Zeppelin service found themselves faced with severe obstacles.

It was learned authoritatively, however, that the plans had not been abandoned.

High aviation sources said one group proposes three routes:

1. An airship service between Tokyo and Hsingking, capital of Manchukuo.
2. An airship line connecting Tokyo with Singapore or Batavia, via Shanghai and Hong Kong.
3. An aerial route from Tokyo to San Francisco or Los Angeles, via Honolulu.

All three schemes call for purchase of two or more German Zeppelins. A German dirigible expert and air pilot called in for advice returned to Germany without, so far as could be learned, reaching any agreement with the Japanese interests. The sponsors were informed Germany could not lend Japan any of her zeppelin experts and pilots except for a very limited time.

Long Service Ended

With approximately 140,000 miles behind him, travelled behind a slowly plodding horse, Henry Gingerich of Baden, Ont., has made his last trip as rural mail carrier after 16 years continuous service over a daily 26-mile route. Only twice in that time did he fail to make his round and storms were responsible both times.

FORD GETS DEGREE

Years of work in the manufacturing field, resulted in educational recognition for Henry Ford, when the automobile magnate received an honorary degree of doctor of engineering at Michigan State College at East Lansing.

Skeena River Floods

Church Is Wrecked But Bible Left On Table Is Undamaged

The flood waters of the Skeena river wrecked the interior of the March Memorial church at Ugk, situated on the river bank, but left the Bible undamaged on a small table, it was revealed in stories brought out from the recently flooded area.

The church organ was overturned, chairs were scattered about the building and the linen cover over the table on which the Bible stood was muddy.

Another story from Ugk concerns three hens that perched in high branches of a tree.

After the water dropped the hens were found under the trees where they had established a community nest in which were found four new-laid eggs.

SELECTED RECIPES

BRAN DROP COOKIES

- 1 cup shortening
- 1 cup sugar
- 2 eggs
- 3 tablespoons sour milk
- 1 cup chopped nuts
- 1 teaspoon salt
- ½ teaspoon soda
- 1 teaspoon cinnamon
- ½ teaspoon cloves
- 2 cups Quaker flour
- 2 cups Quaker Natural Bran

Method: Cream butter, add sugar gradually, the beaten eggs, then milk in which soda has been dissolved and dry ingredients mixed together. Add the nuts broken into quarters. Drop from a teaspoon on buttered baking sheets and bake in moderate oven. Temperature: 350 degrees F.

Star Explosion

Light Reaches Mother Earth After Journey Of 3,000 Years

Old Mother Earth watched from a big seat one of the rarest shows since the universe began—a star explosion that happened long before lehem.

The shepherds saw the star of Bethlehem in an outer rim of space—so far that the earth and the sun are next door neighbors by comparison—the star "blew up" some 2,000 or 3,000 years ago.

Civilizations rose and fell, but even light travelling at 186,000 miles a second—could not give the earth the news of the blast until recently.

Man had suspected for a month that something had happened out there in the Milky Way, for a scientist in Holland had reported that comic rays—children of disintegrating matter—had been travelling to earth in greater and greater numbers from that direction.

On the night of June 28th, an amateur astronomer at Delphos, Ohio, L. C. Peiffer, peeped through his telescope and saw a bright star that wasn't there the night before.

It was so bright he could see it through the telescope. It lay on the boundary line between two constellations, Cepheus and La Certa, which are in the northwestern sky at sunset and directly overhead in early morning.

At Yerkes observatory of the University of Chicago, Dr. Otto Struve announced the star had been on astronomers' maps since 1893, and had not gotten any brighter by 1930, when its picture was last snapped.

Yacht To Be Scuttled

Famous Cutter Britannia To Be Sunk In English Channel

The famous royal racing cutter Britannia will be spared the indignity of the shipbreakers' yard and will be scuttled in the English channel.

Official orders for the sinking of the yacht, so closely identified with the late King George, were issued recently. A month ago it was announced the sails and rigging would be sold.

The Britannia was built in 1893 for King Edward VII. when he was Prince of Wales. The famous cutter won 231 first prizes and 129 other awards in 625 races in the course of 48 years of racing.

Legend Came True

Water Filled Pool In Devonshire When King George Died

The age old legend, "And when the pool fills with water . . ." came true at North Tawton, Devonshire, when King George V. died. The legend says that when the spring-fed bath pool there fills with water, a member of the royal family will die. The spring filled just before the death of the Prince Consort, Albert, husband of Queen Victoria, and of Queen Victoria herself and the Duke of Clarence, first son of King Edward VII. Three days after King George V. lay dead, the water vanished and cattle are grazing there once more.

At its narrowest part, near the Florida keys, the Gulf Stream is fifty miles wide. Farther north, its width reaches 150 miles.

Building For All Insect Parasite Investigations Is Located At Belleville

While it may be true that the character or methods of insect parasites may seem despicable, measured by human standards, the fact is that just now in Canada the Entomological Branch of the Dominion Department of Agriculture is hopeful that parasites will help to control some of the most aggravating problems with which the Dominion is presently confronted. So important do the entomologists regard the parasites that an \$85,000 building has just been built and equipped for the purpose of housing, studying and rearing them in countless numbers. This building stands a little distance back from No. 2 Highway at the eastern entrance to the city of Belleville, Ont. Its modest external appearance might not indicate that it is the most unique and up-to-date building of its kind in the world. It is to be the centre for all insect parasite investigations and work having to do with the natural or biological control of insect pests in the Dominion. The building, in some measure, is the tangible evidence of years of effort on the part of the Dominion Department of Agriculture and the culmination of the thing hoped for by A. B. Baird, entomologist in charge of Parasite Investigations, for whose immediate charge the new Parasite Laboratory will come.

The present Dominion Entomologist, Dr. Arthur Gibson, has encouraged parasite work since his appointment in 1920, and he is entitled to the credit of having advanced the cause that has been made since that time. To be effective, all scientific work must make haste slowly. There is no such word as impetuosity in the lexicon of a scientist. The new parasite laboratory at Belleville is an example of this. While the biological method of control has been recognized, and to some extent applied in Canada for many years, it was not until May, 1923, that the first parasite laboratory was established at St. Thomas, Ontario, for parasite investigations.

In 1925, the parasite operations were moved to Chatham in order to be closer to the centre of the corn borer infestations, which was the counties of Kent and Essex. Gradually the value of the work began to be more widely recognized, and with its wider recognition came some expansion and extension, and another move was decided upon, this time to Belleville. In 1929, the site of the present modern parasite laboratory was bought. On the site of two acres was the former sawmill, with 20 rooms and some useful outbuildings. After a good deal of renovation and the installation of essential equipment Mr. Baird moved from Chatham with his staff, for by this time he had a modest staff. The acquisition of this property marked a definitely progressive step.

Results already attained from the work of the Parasite Laboratory have not only paid for every dollar that has been spent on the work, but what will be spent for years to come. And the work as yet is practically only in its infancy. It has been positively established that the work connected with biological control is a very definite phase of economic entomology, necessitating the development of special technique and equipment. At present there are eleven permanent trained entomologists employed at the Belleville laboratory, the majority of whom have had post graduate training on parasite research, also a number of temporary helpers.

A Foul Accident

A horse and an automobile were involved in a peculiar accident at Lindsay, Ont., when the animal swung its head too far to one side as the car was passing in the opposite direction. The handle on the car door opened the horse through the nose and the animal was freed only with much difficulty.

A species of shellfish found in the Indian Ocean produces a low flute-like sound.

Value Of Farm Manure

One Of Most Efficient Means Of Retaining Soil Fertility

Farm manure naturally constitutes a very valuable by-product on the average farm. This, however, is not always evident, judging from the lack of effort made by many farmers in getting it back to the land with the minimum of loss. Returning manure to the soil is one of the most efficient systems of maintaining soil fertility. If given proper care, it contains considerable quantities each of nitrogen, phosphoric acid and potash in forms which readily become available for plant growth. In addition to the actual plant food contributed, manure also adds humus to the soil, improves its water holding capacity and increases very materially the bacterial life therein.

In order to determine the actual benefit derived from the application of manure in a regular four-year rotation, including oats, barley, clover hay and timothy hay, an experiment was started in 1925 at the Dominion Experimental Station, Knapelburg, Ontario. One area was manured at the rate of sixteen tons, divided into two applications. One of eight tons being disked in for the barley crop and a second of eight tons given to the timothy meadow as a top dressing. The other area received no manure of any kind. Over a ten-year period the percentage increase for the different crops on the rotation receiving the manure was as follows: oats, 45.4; barley, 43.9; clover hay, 75.5; and timothy hay, 115.1. When the increase in yields of the various crops are valued at market prices, the cash return from the manure applied would be \$1.95 per ton.

Might Solve One Problem

Good Market For Canadian Cattle Stock In Russia

Russian markets for Canadian cattle might provide one solution to the problems facing the western livestock industry, it has been suggested to Hon. W. D. Bailer, federal minister of trade and commerce.

In a letter forwarded to the federal minister, the suggestion was made by Jack Byers, manager of the Western Stock Growers' Association. Mr. Byers said if a contract could be reached to provide Russia with a large quantity of cattle during the present year the western ranchers would benefit extensively.

"We have," he stated, "a tremendous surplus of plain steers from the farms and first-class grass cows and heifers from the range country that would certainly suit the trade and could be delivered to the Pacific coast in competition with any country."

Just State Of Mind

Anyone Who Keeps Ideals Will Always Be Young

Youth is a state of mind—it is not a time of life. It is not a matter of ripe cheeks; it is a temper of the will, a quality of the imagination, a vigor. It is a freshness of the deep springs of life.

Nobody grows old by merely living number of years.

People grow old only by deserting their ideals. Worry, doubt, self-distrust, fear and despair—these are the long years which bow the head and turn the growing spirit back to dust.

You are as old as your doubt, as young as your faith; as old as your fear, as young as your self-confidence; as old as your despair, as young as your hope.—United Drug Paper.

Italy's Wheat Needs

With the aid of its reserves, Italy's wheat needs will be filled this year even though weather conditions have jeopardized crops. Edmondo Rosoni, agriculture minister, declared at a meeting of the permanent wheat committee. Premier Mussolini presided.

Forecast New Type

Changes In Human Skull Will Make Men Different

Changes now going on in the human skull which forecast a new type of man were reported to the American Association for the Advancement of Science at a meeting in Rochester, N.Y. This prediction was made in a study of ear bones described by Thomas Horace Evans, of the Long Island College of Medicine.

"There are already structural differences enough among men," said Evans, "to subdivide the human race now, whatever it may have been in the past. The evolution of man is not a question of his ancestors, but of what human ancestors he has had and to what forms he will give rise."

"It is a mistake to worry about the apes. There are now terrestrial forms of man which have animal forms of cranium, and there are changes now going on which will cause future surprise."

"The ear-bones are signs of these changes. All few elements are significant. The cranial changes are plainly evident. A new animal man will be found, and several lines will develop."

Salt Makes Good Roads

Common Salt Makes Surface As Hard As Macadam

Common salt when used in surfacing automobile roads made of a clay-sand-gravel mixture converts its grains into countless tiny robot workmen who labor incessantly at road dressing. The other area received no manure of any kind.

The discovery of this surprising way in which the salt particles move up and down in the road to keep it moist, smooth, tough and dense was made public at Cornell University during the celebration of the semi-centennial of Sigma Xi, honorary scientific society.

The salt particles convert a mass of clay, sand and gravel into a surface as hard as macadam. How they accomplish this was a mystery until their workings were studied in the laboratory of Dr. H. Ries, professor of geology.

Rocksalt is mixed with the top three inches or more of road, with at least two pounds of salt to the square yard. The mixture is smoothed and sprinkled enough to dissolve the salt. It is rolled smooth and hard. As the surface dries it "sets" and stays hard. Rains run off without erosion.

Four Pipes A Day

"Four pipes a day—that's what I like, except sometimes I take five." This is the rule for keeping fit observed for most of her life by Madame Rosette Dequidit of Poperinghe, Belgium. She is now aged 100, and alert, quick-witted, and full of high spirits. Her pipe is a business-like affair with a thick stem and a capacious bowl.

Suez Canal Zone Again Centre Of World Interest As In Ages Long Past

Elmer Goes To Town

Seems That The Man On The Farm Must Go To Urban Centre To Find A Wife

There is no need for any woman, let alone a young woman, to remain in "unclaimed territory" in Canada, the Dominion bureau of statistics said. There are more than enough men to go round.

There is one drawback. Girls in search of husbands must go back to the farm if they want any great number to choose from and less competition. Elmer and the hired men between the ages of 20 and 25, number 198,000, while Maude and the female of the same age number only 96,000.

Country boys have to start to work early. That is one reason a higher percentage of girls from rural communities get high school and college educations than do boys with the same background. Girls become school teachers and secretaries and when the time comes for Elmer to choose a wife he has to go to town. What was the chance and all, he doesn't get to the city often even if he does own a car. He often remains unmarried.

If he starts to court in his own locality, he finds most of the girls getting engaged to older men who had girls of their own age scarce and there are sure to be more than two single men in their earlier twenties for every marriageable girl of their own age.

When Elmer goes in his gasoline chariot to call on a "city gal" he is almost bound to run into competition from "city fellows," for men aged 20 to 25 outnumber women of the same age in cities only by 11,000 for the whole country. Also city-bred Bernice will probably be averse to country life.

Farming is reported one of the most difficult of all occupations for a bachelor and 198,000 Elmers are leading lonely bachelor lives. If young women with matrimony in view want to improve their chances, figures indicate they should specialize in milking and take a post graduate course in butter-making and leave typewriting and school teaching to women with other ambitions.

Will Live On Limer

Because he says he cannot "live" ashore on his pension, Major William Long, retired British army officer, will spend the rest of his life on the ocean. He has booked a permanent passage on the P. and O. liner Barabool, engaged in the London-Australia service. He has completed his second round voyage on the vessel.

A Haughty Peacock in Humble Stitch

Household Arts by Alice Brooks

Gaily Plunged Bird may Adorn Smart, Fallow or Chair Set

PATTERN 5587

This peacock's both haughty and humble for his regal bearing is quite simply realized in a bit of easy cross stitch. The bird's tail is a touch of attention he'll merit, embroidered on a refreshment cloth, chair set, pillow top or scarf. Think what a bit of praise you'll merit, too, for having done this stunning though simple embroidery. Gaily colored fans, plaques, for his brilliant plumage!

In pattern 5587 you will find a transfer-pattern of two motifs 10 1/4 x 13 1/4 inches and two and reverse motifs 2 1/4 x 5 1/4 inches; material requirements; color suggestions; illustrations of all articles needed. To obtain the pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 178 McDermott Ave., W.

There is no Alice Brooks pattern book published.

The ancient canal-like Red Sea, centre of world events from Tutankhamen down to Lawrence of Arabia, is again the stage for history-making in the Italian conquest of Ethiopia.

"The tides of history, religion and culture have ebbed and flowed through the Red Sea and the countries along its hot, desert coasts since the earliest times," says the National Geographic Society.

"Mecca, on its eastern border, was the birthplace of Mohammed, founder of the Moslem religion which now counts more than 500,000,000 adherents. To this holy city hundreds of thousands of Mohammedans journey yearly. To the north is the Sinai peninsula, where the Children of Israel wandered on the way to the Promised Land, and Moses received the Ten Commandments."

"To the west is Egypt, seat of one of the oldest cultures in the world, with a history extending back more than 5,000 years; while across the Red Sea in Southern Arabia is the huge Rub al Khali desert, whose past and present allies are practically unknown to the outside world."

"With the building of the Suez canal, the 1,200-mile length of the Red Sea became one of the earth's greatest commercial highways. British forces, in Egypt on the north and in Aden and British Somaliland on the south, guard its access, control both of the trade routes to India and the Orient."

"Egypt, most important of the Red Sea's hinterlands, is essentially a vast desert through which runs a narrow, fertile strip along the course of the Nile river. Of its 437,848 square miles, only 12,226 are cultivable, but most of this watered area is rich, and irrigation works are enlarging the acreage than can be farmed."

"Egypt borders the Red Sea for more than 550 miles, but has no ports of any importance on this coast. In the Arabian desert, between the coast and the Nile, are several mountain ranges, the highest rising more than 7,000 feet. Oil has been discovered in this desert. West of the Nile the vast Libyan desert, empty save for about 40,000 nomads, extends to the Italian colony of Libya."

"Four-fifths of Egypt's 14,166,898 people are of the ancient Egyptian stock, whose ancestors toiled to build the pyramids. The majority of them are farmers."

"Irrigation from the Nile is building another Dixie in the Sudan, with long staple cotton flourishing under the tropical sun. The Sudan is the home of Kipling's Pussu-Wuzzies, of gum arabic, used in gum postage stamps and envelopes, of a land of terrific sand storms, and with a sun so bright that railroad car windows are tinted to reduce the glare. Port Sudan and Souakin are the only important ports on the Red Sea, extending more than 490 miles from Egypt to Britain. 40,000 people are connected by rail with Khartoum."

Great Orange Eaters

Survey Shows People Of Great Britain Like Fruit

The P. L. A. Monthly says: "In Portugal they grow oranges, and statistically minded people at Lisbon evidently take an interest in what happens to oranges when they are grown. They have compiled a world survey of the subject, and from that survey is extracted the interesting information that the inhabitants of Great Britain are, of all peoples, the most eager for oranges. The occupants of Great Britain eat 20 pounds of them a year per head of population, the people of France and Germany do not manage to reach half that amount, while the Poles absorb only half a pound of oranges in the course of 12 months."

One edition of a large city newspaper will fill a book bigger than the average 300-page novel.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Cyril Deverell has been promoted field marshal as a successor to Viscount Allenby.

During the calendar year 1935 Canada exported gold to the United States worth \$99,446,500, of which \$2,655,226 was of foreign origin.

The smallest microbe yet known has been discovered in London sewage, only a few millionths of a millimetre in diameter.

Marjorie Hillis, French aviator, claims the women's altitude record after a flight which she said reached 45,275 feet.

Beginning July 1 public service vehicle drivers in the United Kingdom have been prohibited from speaking to passengers while in motion.

The 10 ships of the Canadian government merchant marine sold some two months ago were disposed of for \$419,926, or \$4.76 per dead-weight ton.

Councillor D. R. Butler of Derby, England, visiting Toronto, expressed his desire to see more British farmers brought to Canada to use the wealth of the land that is so evident here.

The United States magazine "Asia" was barred from circulating in China by the foreign office which declared the publication contained material unfavorable to the government.

Income tax assessments on Canadians during the year 1929 to 1935 totalled \$4,883,288,993, according to a return tabled in the House of Commons on motion of G. G. McGeer (Lib., Vancouver-Burrard).

The new Dominion parasite laboratory, the only one of its kind in Canada, erected at a cost of \$85,000, was officially opened at Belleville in the presence of many outstanding entomologists of the United States and Canada.

London's Latest Fad

Pictures Made From Butterfly Wings Are All The Rage

London society's latest fad is pictures made almost entirely from butterfly wings. "Bual," the artist has been buying old collections of these wings. He has completed a portrait of Queen Mary in the new medium. The dress consists of 600 butterfly wings, all taken from collections date as far back as 1865. A striking portrait of Princess Elizabeth, entirely from butterflies caught in the nineteenth century has been bought by the Duchess of York. Subjects that lend themselves particularly to this type of art are ships, angel fish, period costumes and coats of arms. Some of the costumes require 1,000 wings.

Had Ample Food

Doubting recent reports that a centipede swallows its young, A. E. Davis and his sons, Jack and Austin, checked up on them when they found one of the insects near Yass, Australia. When they picked it up it had a young centipede half-way down its throat. It swallowed five. The mother was five and one-half inches long and the young ones were an inch long.

Friendship Of A Dog

Many People Consider It A Thing To Be Valued

A teacher in an Eastern city absented herself from her classes a day and a half because of grief over the death of a pet dog. A doctor is quoted as saying that "any teacher who cannot keep up under the sorrow of the death of a dog is in no physical shape to teach school."

People who have dogs, or who have lost them, will not all assent to this view. In many homes the dog is a real "person," a member of the family circle, a friend as well as a pet. Some say that affection should not be lavished upon dumb animals, but the fact is that they inspire affection, and give, in return for it, a grateful faithfulness which human beings do not always exhibit.

It is quite possible that a school teacher, losing one of these friends, would, whatever her physical condition, be incapacitated for her duties. Whether the resulting absence should be at her own or the municipality's expense is another matter altogether. But it is a mistake to suppose that the death of a dog will not seriously affect normal people to whom it has been companion and friend.

Pioneer Navigation

Voyage From England Took Five Months In Early Days

Britain's Commander R.M.S. Queen Mary is a long way removed from the "Tweed," the ship by which he first left England's shore affirms A.H. Fisher, 78-year-old pioneer to this country, who celebrated his birthday at Saltcoats, Sask.

Seventy-one years ago—two years before Confederation—Mr. Fisher disembarked at Quebec from the four-masted schooner on June 18. The boat had set sail on January 10, five months and a week before.

During the 71 succeeding years Mr. Fisher has seen a varied life in Canada. A Northwest, Rebellious veteran, he saw service in South Africa and enlisted for service in the Great War. He also spent some years with the Mounted Police Force.

Only seven when he crossed the ocean, Mr. Fisher recalls vividly the welcome changes in diet which Quebec fork made after five months of salt pork. His seventh birthday two days after landing was a riot of fun amidst a pile of logs on the old wharf. These things stick in his mind, he says.

Alberta Bird Sanctuary

George Benedict, A Lover Of Birds, Dies At Age Of 79

Known in many parts of Canada as founder of the Benedict bird sanctuary near Edmonton, George Benedict, 79, died at his home in Leduc. Forty-four years ago Mr. Benedict and his wife, who survives, fled on the homestead now noted as the Grath Side game farm where rare birds from many countries are kept. Visitors from all parts of the continent had inspected the farm, one of the show places of the province.

Italians Honored

Dr. Marconi, Inventor Of Wireless, Is Named Rear Admiral

Dr. Guglielmo Marconi, inventor of wireless telegraphy, was named a rear admiral of the Italian navy by Premier Mussolini. Il Duce also appointed Baron Pompeo Aloisi, Italian delegate to the League of Nations, to the rank of rear admiral. Marshal Emilio de Bono, who commanded the first stages of the Italian campaign against Ethiopia, was made a Chevalier of the Grand Cross of the Military Order of Savoy.

Horses Shipped To Scotland

From the stables of well known breeders in Southern Alberta, 62 head of horses, Clydesdales and Percherons, left Calgary for Perth, Scotland. Several prize winners were included in the shipment. The animals brought from \$165 to \$250 a head. Freight and charges to destination amount to around another \$100 a head.

North Dakota's vast wheat fields have suffered more seriously from stem rust than wheat in any other state.

Solar Eclipse Observations

Radio Impulses Are Reflected To Earth By Sun Radiations

Indications that the earth's electrified roof, which, many miles above the surface of the globe, reflects back radio impulses, is formed mostly as a result of ultra-violet solar radiations appeared in preliminary observations of the solar eclipse observations.

Prof. Boris Gerasimovich, head of the Soviet eclipse expeditions, said he had been informed that indications of a decisive influence of these radiations in the formation of the electrified roof or ionosphere had been obtained in a quick examination of results. He warned, however, that the information still had to be checked.

Prof. K. Kessenik, head of the Soviet expedition at Tomsk, said a great change was noticed in the behaviour of the ionosphere beginning 15 minutes before the total eclipse when the audibility of radio signals was sharply increased.

The new star of the constellation Cepheus was seen clearly by astronomers at Ak Bulak.

Snake Worship In India

Many Families Engage Reptiles To Live In Home

It is strange but true that millions of people in India worship snakes—little snakes of every variety. Not only are there snake groves in every little village, but in some homes the family snake roves about the hearth unmolested. India's Millions gives some authenticated facts:

Here snakes are encouraged to dwell, in order to ensure freedom for the family from snake bites and misfortunes—leprosy, and the invasion of the house and garden by harmful snakes. The lack of children is another of the misfortunes entailed by any failure to perform regular worship in honor of the family snakes.

There is a "serpent grove" where the worshipper may retire. Snakes are in the form of a hooded cobra, carved from granite. Sacrifices and elaborate ceremonies attend its installation upon a low platform.

Imperial Conference

To Be Held In London After Coronation Next May

Prime Minister Baldwin announced in the House of Commons, that an Imperial conference would be held in London next May immediately following the coronation of the King. The coronation will take place May 12 of next year.

A great gathering of political leaders from Canada, the other Dominions and all parts of the Empire is expected in London for the occasion.

The last regular Imperial conference in London was in 1930. An Imperial economic conference was held at Ottawa in 1932.

Used motor oil can now be given in part payment for new, in Germany.

SUNDAY SCHOOL LESSON

JULY 5

THE COMING OF THE HOLY SPIRIT IN POWER

Golden text: Ye shall receive power, when the Holy Spirit is come upon you; and ye shall be my witnesses both in Jerusalem, and in all Judea and Samaria, and unto the uttermost part of the earth. Acts 1:8.

Lesson: Acts 1:6-14; 2:1-47.

Devotional reading: John 16:1-14.

The Continuing Spirit of Christ, Acts 1:6-9. The apostles were met with their risen Lord on the Mount of Olives. The question they then asked him, if at that time he would restore the kingdom to Israel, shows that even then they were unable to rid themselves of the common Messianic expectation of the Jews that the Christ would rule over a Jewish nation independent of Rome and herself dominant, politically and religiously, over the other nations of the earth.

"It is not for you to know times or seasons which the Father hath set within his own authority," returned Jesus, and then he promised them power through the Holy Spirit, and gave them his great commission independent of Rome and herself dominant, politically and religiously, over the other nations of the earth. The Acts records the story of how Christ continued his work through his followers. The "uttermost part of the earth" was represented by Rome, the capital of the Empire, the place where, as Irenaeus said, "All met from every land, and when he had said these things."

When the day of Pentecost, Acts 2:1-11. When the day of Pentecost was come Pentecost means fiftieth; it was the fiftieth day after the Passover, the disciples were all met together, when suddenly there was a sound as of a mighty wind, and upon each of them appeared tongues as of fire. The tongues of flame—shall we take them literally or as a picture? In the Greek (in which the Acts was written) the word for spirit means wind or breath; and the expression tongues of fire, the symbol of fire, John the Baptist used (Mt. 11:1) as if well known.

The apostles were "filled with the Spirit" at Pentecost, but they did not become perfect Christians. They aspired to a life of elevated purpose and action, and they were conscious of the presence and guidance of the Spirit, and ultimately this inspiration controlled their whole being. Henry Drummond has said that perhaps most of the difficulties of trying to live the Christian life arise from attempting to live the life of the Spirit, and to live the Christian life is "filled with the Spirit."

Many Divorces

All Divorce Applications Came From Quebec This Year

Divorces granted by parliament this session totalled 40, an increase of 10 over last session, Senator Leclerc, McMeans (Cons., Winnipeg) told the senate. All the divorce applications had come from Quebec province, he said.

Divorces were granted this session to 11 husbands and 29 wives.

The cotton boll-weevil is preyed upon by 66 different bird enemies.

Great Skill Required

People Who Produce Miniature Marvels Also Have Keen Eye

A new miniature marvel has recently been attracting attention—the world's tiniest steam engine, which is no bigger than a pen nib. The Hungarian who made it, says it was perfectly life spent making making it out of odd bits of metal and wire, and had to discard numerous parts which were vital fractions out.

This ingenious model is an interesting comparison with what was apparently the previous smallest of all trains. Mr. J. Martin, of Walthamston, London, made a miniature engine and christened it Silver Jubilee; he added two coaches and a guard's van, and the whole train measured no more than four inches. This remarkable model was built solely of gold and silver. Its creator, aged 85, intricate mechanism by which the train could travel at a rate equivalent to two and a half miles a year.

For the world's most striking engineering unit we must turn to Nebraska, United States, where Emanuel Kehm has devised an electric motor capable of some 500 revolutions a second, but which is small enough to rest upon a man's fingernail without overlapping it. Some of the 58 parts of the motor are made of cork, the whole engine, weighing a quarter of an ounce, depends upon a vital link in the shape of a thin strand of cotton.

Also no larger than a fingernail are the excellent portraits drawn by Mr. A. H. Khasaghiyev, of Poonia, who presented a drawing to the King George during Jubilee year. He also made such an etching for King Edward VIII.

To conceive these things an exceptionally keen eye is essential, but even greater skill is required to make the bank-note—what is the thousandth of an inch thick—in two. Yet there was a forger charge recently against a man who did this, and even passed the two halves off as genuine, nearly getting away with it, too. There has been no other case like it in England.

But there is no doubt that where miniature marvels are concerned, the palm must be handed to Mr. Jules Charbonneau. His exhibition of 24,000 miniature objects a few months ago was the fruit of 35 years' collecting and three trips around the world.

He has the Lord's Prayer engraved on a pin head!

To Serve The Prairies

Milk Condensery Being Built At Red Deer, Alberta

Building has been started at Red Deer, Alberta, of the first milk condensery in the Prairie Provinces. The Central Alberta Dairy Pool, Ltd., is initiating this enterprise and Hon. W. N. Chant, Minister of Agriculture, turned the first sod. It is expected that the condensery will be ready for operations late in July. While some of the larger dairies have condensed milk for the ice-cream trade, this is the first condensery on the prairies to put up evaporated milk for the household trade.

A Mechanical Watcher

Electric Eyes Can Detect Approach Of Enemy Aircraft

Electric "eyes" capable of "feeling" fifty miles away will keep a look-out for the approach of enemy aircraft in the next war. The mechanical watcher has been invented by a Chicago soldier-chemist, Mr. A. A. Ambry, who is of German nationality. The "eyes" will pierce fog and smoke screens, it is claimed, and when they sight enemy aircraft they can direct fire on them.

Guarding Beauty Spots

Billboards have been banned from beauty spots by Royal Decree in Belgium. It prohibits them from tourist centers, entrances to villages and certain specified districts, and relegates them to 500 yards from roads, canals and railway lines.

Some people are like a fire alarm. They make just as much fuss over a little trouble as a big one.

Crocheted Cape A Chic "Topnote"

PATTERN 5360

A summer's night—starlight—and your sheers frock call for this lacy capelet, which, in turn, calls for crocheted hook and bit of white, pastel or black thread. You'll love the soft sear collar that ties so fetchingly neatly over your chin, so hurry—if you'd enjoy this cape all summer! It will do equally well for a neighborly visit or a more formal occasion.

In pattern 5360 you will find complete instructions for making the cape shown, an illustration of it and of all stitches used; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

SAYS NO NEED TO ASSUME WAR IS INEVITABLE

London.—"There is no need for panic or to assume that war is inevitable," declared Sir Samuel Hoare, first lord of the admiralty, in a speech at a dinner of the Royal Empire Society.

No country in Europe desires war and it was "criminal folly" to assume that war was inevitable.

"But," he added, "there is no such inflammable material in Europe that a spark might start a conflagration unless great powers like ourselves are strong enough to make our influence felt in the cause of peace."

"We are re-arming to stop the drift to war. If the British army, navy and air force are adequately strengthened in time there will be no world war. British strength, particularly British naval strength, is one of the most potent factors of the peace of the world."

"If a well-balanced fleet, capable of defeating an enemy, keeping the seas open, equipped to go anywhere and concentrated upon its three essential duties—cover, cruising and convey—can be built in time, there will be no world war."

Famous Singer

Former Edith Miller, of Portage La Prairie, Dies in England

Gravesend, Eng.—Mrs. Max Colyer-Ferguson, who before her marriage won fame as a contralto singer, died here recently. She became known as the "Manitoba Nightingale". Mrs. Ferguson was born at Portage in Prairie, Man.

Winnipeg.—Mrs. Max Colyer-Ferguson was the former Edith J. Miller, daughter of the late W. W. Miller, postmaster at Portage la Prairie, Man., for many years. Her beautiful contralto voice carried her to international renown as the "Manitoba Nightingale."

Miss Miller's musical career began officially when she was a student at Westminster Ladies' College, Toronto. She won the gold medal at the Toronto Conservatory of Music after studying under an Italian music master, Signor d'Auria.

She continued her studies for three years in Winnipeg, then moved to Europe, where she continued her music in London and Paris. In the latter city she was a pupil of the famous Madame Marchesi.

Freight Disregarded Signal

Thirteen Persons Were Killed In Spanish Train Disaster

Leon, Spain.—The Madrid express collided head-on with a slow freight train inside a single track tunnel through a mountain near Ponferrada, killing 13 persons and injuring 28.

The signalman on duty said the signals were set as a warning for the freight to take a siding. Authorities decided the signal was not heeded, causing the collision.

Officials said the engine of the freight train disappeared immediately after the disaster, and could not be found. His fireman and engineer and fireman of the express were killed.

Floods In England

Heavy Storms Cause Much Damage In Large Area

Liverpool.—Several persons were dead and large areas in Cheshire, Derby and Lancashire were flooded following heavy storms which swept England. The deaths were due to accidents or to the current heat wave.

Hundreds of houses were flooded along the reaches of the Mersey river, rising in North Derby and flowing into the Irish sea at Liverpool. Railway transportation was seriously hampered in places. Mersey Road station at Liverpool was under water.

Left Without Debate

Parliament Prorogued Before Many Motions Were Dealt With

Ottawa.—Eight private-member motions designed to prompt government action in various directions looking toward betterment of the social and economic system were left half and dry on the House of Commons order paper without ever having gone beyond the printing stage.

Prorogation of parliament left six other private-member motions and one senate bill on the order paper in various stages of debate. These included the permissive senate measure to authorize establishment of free foreign trade zones in Canada.

Debate was unfinished on motions to raise money by higher income tax to put all unemployed at work at prevailing rates of pay; to reform Canada's attitude toward the League of Nations; to guarantee fixed minimum prices to primary producers of grains; to revoke the empire trade agreements and to amend the criminal code.

Notices of motion that got no farther than the order paper included parliamentary, government and law reform proposals; rescinding the sockeye salmon treaty with the United States; a survey of Canada's national production capacity; readjustment of the representation in the House of Commons; use of electrical energy in place of coal on railways and for heating purposes; that tariff protection be withdrawn from industries paying low wages; reduction on the national debt structure and the interest payable thereon; establishment of a system of national scholarships to aid qualified pupils in universities, colleges and technical schools.

Abolish Office

De Valera Decides To Do Without Governor-General

Dublin.—President Eamon de Valera announced in the dail that the office of governor-general would be abolished in the projected new constitution. Instead, he said, an elected representative of the people would be the ceremonial head of the state.

James McNeill, first governor-general of the Irish Free State, was appointed in 1928 and offered his resignation to the king on Oct. 3, 1932. His Majesty accepted it on advice from De Valera, president of the executive council.

His successor was Donald Buckley, a member of the dail who had played a prominent part in the 1916 Easter rebellion.

For some months before McNeill's resignation there had been friction between the governor-general and President de Valera over slight offers the former by members of the Free State government.

Successful Treatments

Medical Association Told Of Gastric Ulcer Cases

Victoria.—Of 40 cases of gastric ulcers, treated with regular recognized treatment, not with any innovations, 33 were apparently entirely relieved of symptoms of the trouble for five years or more after the treatment. Dr. E. E. Cleaver, Toronto, told the Canadian Medical Association.

The 40 cases reviewed were all people of fairly advanced years. The treatment was diet and a duodenal tube.

X-ray pictures were taken at the time of the first treatment and at the end, so that the results were studied closely.

Dr. Cleaver said gastric ulcer had a natural tendency to heal itself.

Young Publisher Honored

Editor of "Le Petit Jour" Receives Academy Award

Edmonton.—Pierre Auger, of Vancouver, French consul for western Canada, at a reception here decorated Jean-Baptiste Boulinger, 13-year-old Edmonton publisher of a French language newspaper, with "la Médaille Vermeille" from l'Académie Française. The award was made by the academy recently for the lad's work on his paper, Le Petit Jour. 2137

EMPEROR!

A new picture of King Victor Emmanuel of Italy, who, by virtue of his army's conquest of Ethiopia, is expected shortly to be crowned Emperor of Ethiopia.

Would Not Shorten Hours

Geneva Labor Meet Favors Principle Of Paid Vacations

Geneva.—The international labor organization ended its annual conference after adopting the principle of paid vacations for workers and rejecting the universal 40-hour week.

Although six nations have already adopted the 40-hour week, C. B. Brammaes of Denmark, chairman of the conference, announced in his report the shorter hours schedule would remain a future goal of the labor office rather than an immediate project.

The labor office ought not to abandon the 40-hour week, Harold Butler, director of the international labor organization, told the delegates. He recalled the 48-hour week, first proposed as early as 1848, was not put into practice until 1919, and that the 40-hour week was not accepted by any nation until 1931.

Message From King Edward

Canada Receives Thanks For Congratulations On His Birthday

Quebec.—King Edward asked Lord Tweedsmuir to extend to the people of Canada his "cordial thanks for their loyal congratulations and good wishes," on his 42nd birthday.

The King's message, received by the Governor-General, at present living at the vice-regal quarters of the Citadel, was in reply to a cable sent by Baron Tweedsmuir.

Sellasse Not Welcome

Berne, Switzerland.—The federal council asked Emperor Haile Selassie to stay out of Switzerland except for a visit to the League of Nations. The Swiss asked the Ethiopian monarch to "refrain" from living in his villa at Vevey as long as "the Italo-Ethiopian conflict is unsettled."

FORMER GOVERNOR-GENERAL ATTENDS LEVEE

The Earl of Bessborough, former Governor-General of Canada, chats with the policeman on duty at Buckingham Palace as he leaves the Levee held by the King.

Lifting Of Sanctions

Lloyd George Is Critical Of Action Of Government

Sawley, Derbyshire.—"Last night I saw the white feather embroidered across the Union Jack by a skilled and practised hand," said David Lloyd George in a speech commenting on the government's decision to lead the move to lift sanctions and debate in the House of Commons.

"I am one among the many millions in this land who are humiliated by the spectacle," the former prime minister declared, referring in scathing terms to the government's "betrayal of Abyssinia."

"They had three foreign ministers undertaking the task," he said, "but one after another threw in his hand because he was afraid to tackle the job. We ought never to have taken the task in hand unless we meant to put it through."

"There is no sympathy anywhere on earth for this act of aggression."

"We are told—if you threaten sanctions against an aggressor, he may hit you in the eye. But it is really coming to this: That Britain won't do its duty for fear of a black eye."

"We seem to be impotent with the whole British Empire behind us, impotent against one man—buffed by Mussolini, fooled by Laval. The voices of the people and the voices of the dead are calling upon them to insist that Britain should lead the world again upon the path of right."

Agronomy Officers Elected

Prof. Ellis Of Manitoba Presided At Annual Convention

Swift Current.—At the closing session of the 15th annual meeting of the Western Canadian Society of Agronomy, the following officers were elected: Hon. presidents, President Murray, University of Saskatchewan; President S. E. Smith, University of Manitoba; Hon. vice-presidents, Dean E. A. Howes, University of Alberta; Dean E. A. Savage, University of Manitoba; Dean A. M. Shaw, University of Saskatchewan. General executive: President, Geo. Delong, experimental station, Lacombe, Alta.; vice-president, Dr. F. E. Clark, experimental station, Swift Current; secretary-treasurer, Dr. P. G. McCrostie, University of Manitoba; director, J. E. Blakeman, seed branch, Winnipeg.

The convention opened at the Dominion experimental station and was presided over by Prof. J. H. Ellis, University of Manitoba, president of the society.

All Provinces Represented

Fredericton, N.B.—Representatives from all nine Canadian provinces will be included in the 250 delegates attending the annual convention of the Canadian Society of Technical Agriculturists here July 13 to 16. Retiring president is Dean Malcolm Shaw, agricultural college, Saskatoon, Sask., and a member of the Canadian Grain Board.

WILL ATTEND LEAGUE MEETING IN SEPTEMBER

Ottawa.—Prime Minister Mackenzie King will head Canada's delegation to the meeting of the assembly of the League of Nations at Geneva in September. He will also attend the coronation of King Edward and the Imperial conference in London next May. Because of those journeys he will be unable to go to France next month to attend the unveiling of the Canadian war memorial at Vimy Ridge.

Mr. King said he had asked Hon. Ernest Lapointe, minister of justice; Hon. C. G. Power, minister of pensions and health, and Hon. Ian MacKenzie, minister of national defence, to represent the government at the Vimy ceremony.

At the fall meeting of the League assembly the revision of the covenant and reorganization of the League will be discussed.

Conservative leader, Rt. Hon. R. B. Bennett, commanded Mr. King's decision and said it was highly desirable the prime minister should attend such an important meeting.

The assembling of the next session of parliament would depend on developments at Geneva. If important decisions were arrived at requiring parliamentary ratification, parliament might be assembled late in November of this year, Mr. King said. The government's present intention, however, was to call parliament earlier in January and endeavor to conclude before the King's coronation, May 12.

At the adjourned meeting of the assembly of the League, June 30, Canada will be represented by Hon. Philip Roy, minister to France; Hon. Vincent Massey, high commissioner in London, and Dr. W. A. Riddell, Canada's permanent advisory officer at the League of Nations, with Loring Christie of the department of external affairs as advisor.

Demand From Russia

Wants Free Passage Through Dardanelles For Submarines And .

Montreux, Switzerland.—Foreign Commissar Maxim Litvinoff of Russia demanded Russian submarines as well as other warships have free passage through the Dardanelles.

His request, made of the Lausanne treaty signatories, came in response to a Turkish proposal under water craft be barred from the strategic straits which Turkey wishes to fortify.

Litvinoff declared he was unable to see why other countries should want to dispatch warships to the Black Sea unless they were sent on courtesy calls or on sanction missions for the League of Nations.

Litvinoff asked aircraft-carriers and submarines of non-Black Sea nations be barred from the Black Sea.

Japan insisted on complete reciprocity in the movement of warships in the Black Sea.

France took the stand powers not bordering on the Black Sea should be given unrestricted passage through the Dardanelles if acting under the mandate of the League or helping a victim of aggression under regional pacts.

Motor Torpedo Boats

Six Boats Of New Design Handed Over To British Admiralty

Portsmouth, Eng.—The first of six new high-powered motor torpedo boats which British experts assert are likely to revolutionize naval design and construction was handed over to the admiralty.

The craft, which will be inspected by the king, is able to manoeuvre so deftly it is considered to be invulnerable to an air attack. It can make more than 40 miles an hour.

Carrying a crew of 10, the vessel is equipped with two torpedoes, which may be fired by wireless, and light gun armament. Eighteen of the boats, it is said, can be built at the cost of a single submarine destroyer.

FLEMING'S FOLLY

— BY LAWRENCE A. KEATING —

CHAPTER XVIII—Continued

His arms were firmly bound behind him. Mell, his usually mask-like face lined with revengeful hate, jostled close. "Yuh low down make!" he snarled. "Yuh's killed yuh, Fleming—I was lookin' for yuh an hour back. But this'll do just as well. Maybe better. Turned bank robber, eh? Well, yuh ain't gettin' away with it!"

"Where's Stephen?" some asked. "Out o' town. We better hurry before he gets back!"

The larist threaded through the iron ring fell and struck the rancher's shoulder. Eager hands seized it and fixed the noose. "Gyp, yuh tie this to yore saddle. When I give the word—ride!"

Then he saw Gyp Vaille. Link started. His eyes went round and he gasped. For Gyp Vaille, the trouble maker at the dam, who was Kilgo's henchman, was dressed in a dark checkered shirt and corduroy trousers. Gyp Vaille had been with Berrens in that holdup!

A moment of quiet descended on the throng. Main Street was packed with men in a fifty-yard circle from the pole. Heads kept bobbing up, angry faces bearing the bitter imprint of aroused hate and grim determination to carry this through. There seemed no help, no chance to explain. It must be eleven-thirty or more. At twelve Roper would own the Triple H.

At twelve . . . Link's heart sank. At twelve he would be swinging lifeless from the flagpole.

"All set there?" Gyp swung a heavy thigh over his saddle. He picked up the reins and gestured for men to move out of his path. The rope stretched from the noose around Fleming's neck to the eye at the pole top, thence to the saddle horn of the tawny roan.

"I'm ready," Vaille growled.

"Then string him up!" yelled Kilgo.

"WAIT!" A lithe, litesome figure burrowed through the crowd. With outflung hands Helen Hamilton snatched the bridle of Vaille's horse and stopped the beast as it took a step forward. Before anyone could prevent her, she plunged to Link's side, twelve feet away. Something gleamed in the sunlight and there was a quick flash of a knife. The knife came close above his mass of brown hair snipped and fell on his shoulder.

"He's not guilty!" the girl cried, and threw herself in front of him. "Men, this is murder—cold-blooded murder! Yuh shan't do this to him. A curse downed her last words. Kilgo reached for her arm to jerk her away, but missed. His fist knocked the knife from her hand and sent it spinning into the dust.

Helen backed, against Link spreading her arms protectively. But Roper, his face aflame, grabbed at her. "Get away from there!" he commanded, and tugged roughly. "We're goin' to lynch that lobo and yuh can't stop it!"

She struggled to get free of him. Link, tussling with his hands, watched in helpless rage. Suddenly there came the sharp sound of cloth tearing. By chance Helen had ripped the Box 90 owner's grey flannel

shirt. Something green was exposed—and Roper, sensing it, put his hands to the spot and glanced down. Helen uttered a gasp. "Why, it's money!" She shot a swift look at Link.

There was a split second's pause as all eyes fixed on the burly rancher hurriedly stuffing the packet of bills in a brown flannel wallet back into his torn shirt.

"That's our cattle money!" Fleming roared.

CHAPTER XIX.

If the crowd had been in turmoil before, it was bedlam aroused now. Buzz grunted, his jaw slack. Roper gulped hard, strove to think of something, but, like a small boy caught rifling the jam closet, was nonplussed.

Not so the plucky girl. She spun around and her hand flashed to the man nearest her. A gun glinted, its blue-black barrel catching the sun's rays as she thrust its muzzle hard against Kilgo's stomach. "Yuh held up Link!" she cried accusingly. "Don't move or I'll kill yuh!"

The crowd froze. By some quirk of mob psychology it was as if she held a gun pointed at the stomach of every individual present. All eyes held on Buzz Hamilton's sister as with her glossy chestnut hair disheveled, her face white, her chest rising and falling with excitement and the exercise of the tussle, she held them spellbound with the curve of her forehead over the trigger of the gun.

"That's Link Fleming's wallet! Why, it has his name right on it. Isn't that yours?"

"Yes." She did not swerve her eyes from Kilgo as she spoke. "Killed yuh, yuh let Link free. Quickly! Seth Hovland, are you in this plot to lynch an innocent man? Can't yuh believe now that someone held Link up?"

"It was Gyp Vaille—grab him!" At the Star Loop owner's command Vaille whirled and started to run. Seconds ticked past without a move made to halt him. Then, uttering a guttural curse, Gus, the pink-faced bartender from the Half Moon, whipped out a gun from under his soiled apron. It cracked once and a spurt of dust rose close behind the fleeing man. Again it roared.

Vaille's arms flung up. His below of pain carried back to the stunned throng before the jail as he spun on one heel—and fell.

As if by magic the crowd began slowly to melt away. Uncertainty and puzzlement were on every face. "Yuh mean Vaille stuck Link up, took his steer money, then gave it to Kilgo? But what was Gyp doin' in the bank?"

"Chased there, maybe. I—uh—believe me, collection," Otto Pieper spoke up in a voice that trembled. "I had no knowledge of that—er, miscreant's presence! But it seems Link and his men were searching the town. So Waco Byrne just informed me."

Link, free at last, looked up. Some instinct caused him to turn his head. Helen's hands flew to her throat in a gesture of fear. A pathway widened through the crowd as if by magic. And ten paces away, standing at some distance, his weight evenly distributed on both feet, waiting was . . . Jackpot Mell.

His eyes were brittle and gleaming as the jealous eyes of a wolf. He twitted a hand dangling at his side with ominous significance. "Link," he rasped in harsh, hateful tones, "I'm waitin'!"

Fleming scarcely heard the words. He was unconscious of the ripple of gasps over the crowd, melting away. A weight made itself known, and looking down he saw in dulled surprise that someone had slipped a forty-five into his holster. Waco Byrne.

He swallowed to ease his throat, suddenly gone parched and dry. Through his brain flashed repetition of the thought he had had these last few days, that never before had he faced an opponent so quick as Jackpot Mell. Seven men had gone to their death at the roar of his flaming gun. Would he be number eight?

Strangely, he felt no fear, but a

ITCHING

ITCHING STOPPED FOR ONE MINUTE! For quick relief from the itching of pinhead bites, eczema, athlete's foot, rashes and other skin eruptions, apply this famous ointment. It is the only one that soothes the irritated skin. Clears most intense itching instantly. A 35¢ trial bottle sent free. Write for it today. Ask for it at D.D.S. Prescription.

great calmness. And overpowering curiosity as to what was going to happen. Cool, his eyes fixed unwaveringly on Mell's whole six-foot gaunt figure until they became hot, and he blinked. The wait seemed to lengthen into years. In reality it could not have been more than ten seconds.

Jackpot's right hand moved. With the speed of a streak of light the Star Loop owner plunged for his gun. As he fired he knew with chagrin that Mell had drawn first by the margin of a clipped second. He felt a hot, jabbing sensation in his left shoulder, heard his sixgun roar its second time as Jackpot fired again and again. Then staggering from the collision of slug and flesh, Link whirled and fell.

But he was not out. He lightened his hard fingers around the Colt and jerked onto his left elbow. His paining eyes sought desperately to focus on the slugging figure.

Mell was a mere heap of clothing in the dust.

"Link! Link!" Helen started to ward him but suddenly halted, and vivid red fear sprayed across her face.

For Roper Kilgo, his florid countenance deeper crimson than ever before, had been the first man to the side of Jackpot. Now he straightened, and a bull-like roar of fury burst from his fat lips. His hand jabbed for his gun. Whipping it out, he fired.

Wham! The first shot speared dust into Fleming's face and eyes. All but blinded, he was gripped by red rage at the cowardly tactics. With a great effort he climbed dazedly erect and retreated. Sighting hurriedly, he sent a bullet timed to the nth degree with Kilgo's second shot.

(To Be Continued)

Seeks Fame And Fortune

Chinese Boy Earning Way To Hollywood In Original Manner

Consider the case of Eng Wing Koon, hanger-on the pictorial extraordinary, who seeks to make fame and fortune in Hollywood.

Koon is crossing the continent by swinging from his pictorial, dangling in chosen spots, that is, to gather money and pay his way to choice hanging scenes further west.

He learned the art in New York, he told state police at Bloomingdale, N.J., who were so naive as to question his travel technique.

All he needed was a soap box to stand on and he got his pictorial tied to an overhead lamp-post or tree limb, he explained.

He hung by his pictorial for about five minutes in Bloomingdale, then lowered himself to the ground and started passing the hat.

The inquisitive state police took him to the county jail at Roanoke and asked their colleagues in New York about him.

"Hold him," came the reply. "We are looking for some Chinese murderers."

But Eng was no murderer. The police contacted his father at 70 Bayard street and learned that Eng, far from being a fugitive, sought the limelight of publicity.

So the police gave him a free night's lodging. He proceeded to pictorial his way to Hollywood.

Aims At Complete Record

A complete pictorial record of every Indian tribe on the continent will soon be undertaken by Winold Reiss, artist and designer of Montreal. Mr. Reiss, an authority on customs and arts of the North American Indian, has spent much of his life studying the tribe of Indians known as the Blood or Piegan of Alberta.

Plans have been submitted for spiral roadways around the Eiffel Tower in Paris to enable automobiles to climb to a restaurant on the second platform, about 400 feet above street level.

A Question Of Luck

Dionne Sisters Have Fortune While Other Children Lack Necessities

Doubtless Dr. Allan Dafoe deserves the fame which has accrued to him through his successful treatment of the Dionne quintuplets. Film producers are not to be unduly concerned if they esteem it profitable to invest hundreds of thousands of dollars in the future earning capacity of the five over-plusful infants.

Is there not, however, a question of values here, the kind of question which breeds skepticism in the intelligent young? A current news item refers to "the thousands of people who made unselfish offers of help to the babies in the early days." Those "unselfish offers" indicate a laudable condition of human sympathy. They also indicate the disproportionate generosity of an emotional mob.

Five infants receive wealth such as their parents never dreamed of possessing, simply as a reward for being born. "Neither the babies nor the rest of the Dionne family need worry about their normal requirements for the rest of their lives," announces the Ontario Minister of Welfare. Whether that is fundamentally beneficial remains to be proved. Everyone will agree that it is good to feel financially secure. No need to be apprehensive about the supply of the quintuplets.

Yet—there's a brave little youngster at the corner of Main Street, a lad of twelve, who trudged about in a year of school in the middle of winter, running errands and shoveling snow after school hours, who would like to go to college some day, but probably won't be able to finish high school. A child with an intellect, his teachers say, a child who should have an opportunity. His mother is a widow, and he has two younger sisters.

There's another child on Main Street—a girl of seven, delicate-featured, with a far too solemn expression in her gray eyes. Her parents are educated, but they are "on relief," and it's very cold when there's no fuel to light the kitchen stove. The last time it was lighted the mother made all the flour they had into doughnuts, which the little girl hawked around the neighborhood.

Sometimes the little boy and the little girl wonder why no "unselfish offers" from a sentimental public come showering down on them. It was a mistake to come singly. They should have come in fives—Christian Science Monitor.

A Valuable Collection

Stamps Belonging To Late King George Worth Small Fortune

King Edward has directed that there should be no relaxation on the part of Sir Edward Bacon, curator of King George's stamp collection, in maintaining the standard of the wonderful collection King George built up, states the London Daily Sketch. From the point of view of Empire examples, it has not a parallel. It was a hobby in which King George found much pleasure and wherever he went for a protracted stay—at Balmoral, Sandringham or Windsor—books of his stamps went too. The Royal hobby was known all over the world, and this addition to the collection was due to the thoughtfulness of fellow collectors in other countries. As an example, when the day and night air mail service across the United States was opened, R. H. Wilcox, head of the post-office division of the Customs House, himself a stamp collector, thought of the King, and sent a letter by the first mail for his Majesty. The value of the Royal collection is stated to be several thousand pounds.

Vegetable Duty

The department of national revenue has announced the fixed valuation for duty purposes on cabbage and cauliflower is now also applicable to Manitoba, Saskatchewan, Alberta and British Columbia.

The Strong Man: "I developed these muscles working in a boiler factory."

Innocent Flapper: "Oh, you great big wonderful man! What do you boil?"

Little Helps For This Week

Turn ye to the stronghold, ye prisoners of hope. Zech. 9:12.

O power to do; O baffled will; O prayer and action, ye art one. Who may not strive may yet fulfill!

The harder task of standing still. And good but wished with God is done.

That God has circumscribed our life may seem a possible element of trial, but often it defines our way and cuts off many tempting possibilities that perplex the free and strong; while it leaves intact the whole body of spiritual reality "that if we know these things, happy are we if we do them." We know that God orders the lot, and to meet it with the energies it requires, and permits neither more or less, to fill it at every available point with the light and action of an earnest mind even if this action be narrowed, is what in that condition we have to do.

No Necessity For Speeding

Time Gained Is Usually Not Worth Thinking About

There is no necessity for people to be rushing about the province at 50 miles and more per hour. In Great Britain the Pedestrians' Association, has set a fifty fathoms against speeding, and is clamoring for a country-wide speed limit.

Most of the road accidents there are here are due to speeding, and the association examined the circumstances of a large number of accidents due to this cause. It found that the time sought to be gained was usually a matter of a few seconds. We in Manitoba can be equally sure that 90 per cent of the speeding on our highways lacks any legitimate excuse. — Winnipeg Tribune.

Used On Emergency Issue

Head Of Baden-Powell Once Approved On Postage Stamp

Lord Baden-Powell, now in his 80th year, has one claim to fame which most of his Boy Scouts don't know about, says London Answers. He is the only living Englishman not of royal blood whose portrait has appeared on a postage stamp. It was during the siege of Mafeking. All the stamps had been used and no portrait of Queen Victoria was available from which new ones could be prepared. So, without consulting "C.B." an emergency issue was made on which his head had been reproduced.

Knew Human Nature

Diarsell Had Method Of Greeting Followers In House

Diarsell confessed, although he was always forgetting their faces and never remembering their names, he had no difficulty in being pleasant to his followers in the House. "When I meet anybody in the lobby whom I don't know from Adam, and I see he expects me to know who he is, I take him warmly by the hand, look straight into his eyes, and say: 'And how is the old campaign?' I have never known it to fail."

Valuable Gold Nugget

A gold nugget weighing slightly more than five pounds—one of the largest, if not the largest ever found in the North Transvaal—is reported to have been named by a young prospector named J. J. Baker. The find was valued at \$25,000.

England is experimenting with a new variety of hops, which is expected to be especially suited for brewing stout.

Get Your Baseball Ticket.

The committee in charge of the sale of membership tickets in the Baseball Club are meeting with fair success in the disposal of these. This chore has now been left to two of the committee, Messrs H C Oatway and Wm C Miller, the latter gentleman being at the pool hall. Be a sport and get yours, for 4 bits.

TOO, ARE ESSENTIAL IF YOU WANT YOUR SALE TO BE A SUCCESS. BRING YOUR LIST TO

The STONY PLAIN SUN

Trade Exams. to Come Soon.

Examinations under the Tradesmen's Proficiency Act will be held in various centres throughout the province, at an early date.

The examination board will consist of 5 men specialising in various trades, all of whom will be drawn from the existing Government service, save one. This official will be an inspector for the barbers, as there is no inspector for this class of people at the present time. It is expected that Mr W S Heron will secure the appointment.

HIL'S HAMBURGERS.

The painting and decorating have been completed on Hil's Home for Contented Hamburgers, on the main stem. The piece de resistance in the way of outdoor decorating is the almost life-size fac simile of a well known hot bar. But we digress, as the specialty at this popular eat-out is Hamburger. (The printer will please spell this with a cap. H)—not the common or garden variety composed in part of run-of-the-mill steaks and chops etc.; BUT the ones you are offered here, hot off the griddle, are made from the choicest parts of hand-picked purebred animals, imported from Holborn and other cattle raising districts where the grass is long and juicy.

That Hil's Hamburgers have attained an almost world-wide reputation is attested by the large number of tired business men and others which foregather at this dining salon on evenings throughout the year, to fill up on the luscious interior decorations. (Contributed.)

Mebbe You No Lika Heem?

The new provincial stamped scrip, which is due to be issued in the course of 3 or 4 weeks, is described as being of a "pleasing appearance," and will be of a size corresponding to that of the paper money of the Bank of Canada. The design will be lithographed in colors. They will be counterfeit proof, printed on special paper.

Spaces will be provided on the reverse side for stamps, and a condition of the circulation and use of the certificates will be that every such space dated by weeks, must be covered.

Crops Good at Peace River.

The weekly report of the Dept. of Agriculture, Canadian National Rys. says: "From the Peace River territory come reports that the weather has been fine and warm, with occasional showers. Crops are in excellent condition and growing fast."

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

TENDERS WANTED.

Tenders will be received by the undersigned for painting Blueberry Schoolhouse No 1444. Tenders must be in the hands of the Secretary, not later than July 10th. The lowest or any tender not necessarily accepted.

Send sealed tenders to
JOHN P. FUHR,
Secretary Blueberry S.D.,
Stony Plain P.O.

Stony Plain and District.

Miss Nora Kowensky was the guest at a farewell party in her home, Tuesday night, given by Miss Higgins, at her apartments on Main street.

Miss L. Kowensky, who is leaving this week for her new home at Grand Prairie, was the guest at a reception in her honor on Monday afternoon, at the home of Mrs R M Oatway.

Mr H C Oatway leaves today for Edmonton, where he will resume his studies at the U. of A.

Miss Woods, principal at the S.P.H., has resigned her position; as also has Miss Bates, of the Public School teaching staff.

A large number of visitors were in town yesterday, to attend the sports meet at the Fair grounds. The dance in Kelly's hall in the evening also attracted a large crowd, a number of these having motored out from the City.

An auction sale is being held on Tuesday, July 7, of the stock and chattel of the Morris Dahlen estate. The sale will be held on the property of Mrs J Lackey, immediately west of Rocky Rapids schoolhouse.

Get your Edmonton Exc. tickets from Mr Larson, at the Royal Cafe.

BUTTER AND EGGS WANTED at The Royal Cafe.

We Raise Good Hogs.

The idea seems prevalent that good hog raisers are scarce; but this district has 'em, as we know by the truckloads which go thru town every day. The latest record for good hogs was that made by Mr George Liebert, who on Friday had a load trucked in to an Edmonton packing plant. 15 hogs in all. Twelve of these graded Selects, and the other 3 bacon. These were a choice lot of six-month-olds, and fetched the sum of \$276.67.

The New Co-op.

A public meeting was held in Kelly's hall on Saturday evening last for the purpose of discussing the project of opening a co-operative general store in Stony Plain, "where you share in the profits as you buy." Several speakers, prominent in the Co-operative movement were on hand and gave addresses.

Missouri Lutherans Meet.

The annual convention of the Alberta and British Columbia district of the Lutheran Synod of Missouri is being held this week in Edmonton. Business sessions are being held in Concordia College, and evening public meetings in St Peter's church. About 70 delegates are present from the two provinces, and are being housed in Concordia College.

Rev F Randt, St Paul, Minn., Vice Pres. of the Synod, and Rev J Herzer, Winnipeg, are among the visiting speakers.

The sessions continue until July 7th.

Duffield Sports Day, July 8.

The new Duffield Sports Club, under the presidency of Mr James Ollinridge, will hold its picnic on Wed. July 8. A big day of athletic events is assured. There's to be Indian sports, which are seen at Duffield exclusively each summer. In addition, there will be horse races, baseball, basketball, and boxing. In the latter event, our own Don Carmichael will don the gloves, in an encounter with Walt LaRoupe of Onoway.

There will be a dance at night in Smithfield Hall.

Vancouver's Golden Jubilee

Vancouver, Canada's gateway to the Orient, can well be proud of her fifty years of progress and her miraculous growth from an unknown fishing port to one of the largest ports in North America.

Vancouver is the leading grain port of Canada and the Pacific Coast. It has 96 miles of waterfront.

In 1886 there were 2000 people in Vancouver. Today there are 310,177. It is a great snipping and lumbering centre. It is a great mining and fishing centre.

It is the playground for thousands

of travelers from all parts of the world.

The Golden Jubilee Celebration officially opens July 1st will last for more than two months.

Naval, military and air force displays; parades; International yacht races; Shriners and Orange day celebrations; flower shows; Soccer championship play-offs; Oldtimers' parade; the Great Exhibition, and the visit of His Excellency the Governor-General of Canada are outstanding events in the Jubilee Celebration program that will turn Vancouver into a playground during the summer.
